**History and Social Theory** 2005 Peter Burke Taking into account new developments since this book was first published, 'History and Social Theory' discusses topics including globalization, postcolonialism and social capital.

**The Power Of Positive Thinking** 2021-01-01 Norman Vincent Peale THIS BOOK IS WRITTEN to suggest techniques and to give examples which demonstrate that you do not need to be defeated by anything, that you can have peace of mind, improved health, and a never ceasing flow of energy. In short, that your life can be full of joy and satisfaction. Of this I have no doubt at all for I have watched countless persons learn and apply a system of simple procedures that has brought about the foregoing benefits in their lives. These assertions, which may appear extravagant, are based on bona fide demonstrations in actual human experience.

**The Canon of Medicine (al-Qānūn Fī'l-ṭibb)** 2014-10 Avicenna Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of "Canon of Medicine" (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

**Educating for Character** 2009-09-02 Thomas Lickona Calls for renewed moral education in America's schools, offering dozens of programs schools can adopt to teach students respect, responsibility, hard work, and other values that should not be left to parents to teach.

Testing Statistical Hypotheses 1986 Erich Leo Lehmann This classic work, now available from Springer, summarizes developments in the field of hypotheses testing. Optimality considerations continue to provide the organizing principle; however, they are now tempered by a much stronger emphasis on the robustness properties of the resulting procedures. This book is an essential reference for any graduate student in statistics.

*The Subtle Art of Not Giving a F\*ck* 2016-09-13 Mark Manson #1 New York Times Bestseller Over 10 million copies sold In this generation-defining

self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F\*\*k positivity," Mark Manson says. "Let's be honest, shit is f\*\*ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F\*\*k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance, honesty, responsibility, curiosity, and forgiveness we seek. There are only so many things we can give a f\*\*k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, The Subtle Art of Not Giving a F\*\*k is a refreshing slap for a generation to help them lead contented, grounded lives.

**Genre, Text, Grammar** 2005 Peter Knapp A comprehensive reference text that examines how the three aspects of language (genre, text and grammar) can be used as resources in teaching and assessing writing. It provides an accessible account of current theories of language and language learning, together with practical ideas for teaching and assessing the genres and grammar of writing across the curriculum.

**House of Glass** 1997-07-01 Pramoedya Ananta Toer With House Of Glass comes the final chapter of Pramoedya's epic quartet, set in the Dutch East Indies at the turn of the century. A novel of heroism, passion, and betrayal, it provides a spectacular conclusion to a series hailed as one of the great works of modern literature. At the start of House of Glass, Minke, writer and leader of the dissident movement, is now imprisoned—and the narrative has switched to Pangemanann, a former policeman, who has the task of spying and reporting on those who continue the struggle for independence. But the hunter is becoming the hunted. Pangemanann is a victim of his own conscience and has come to admire his adversaries. He must decide whether the law is to safeguard the rights of the people or to control the people. He fears the loss of his position, his family, and his self-respect. At last Pangemanann sees that his true opponents are not Minke and his followers, but rather the dynamism and energy of a society awakened.

Controlling Corruption 2000 Robert Williams After three volumes presenting the desolate scenario of corruption around the world, volume 4 (of the four-volume reference) focuses on anti-corruption strategies, including a wide variety of approaches that illustrate the scale and difficulty of the task and offer no simple answers. Twenty-nine articles discuss general issues, control via codes of conduct and legal and formal means, anti-corruption measures in civil service and government agencies, prevention and sanctions, people and reform, and whistleblowing. The articles (reproduced in facsimile) are from journals such as Comparative Politics, Crime, Law, and Social Change, Corruption Reform, and European Journal of Development Research. Editors Williams (politics, U. of Durham, UK) and Doig (public services management, Liverpool John Moores U., UK) made the selections. The volume is not indexed, except by name. c. Book News Inc.

This Earth of Mankind 1996-05-01 Pramoedya Ananta Toer Minke is a young Javanese student of great intelligence and ambition. Living equally among the colonists and colonized of 19th-century Java, he battles against the confines of colonial strictures. It is his love for Annelies that enables him to find the strength to embrace his world.

*Investing in Early Childhood Development* 2015-01-15 Rebecca K. Sayre This study provides an overview of Bank investments in Early Childhood Development (ECD) from 2000-2013 within the Education, Health, Nutrition and Population, and Social Protection and Labor practices.

Footsteps 1996-05-01 Pramoedya Ananta Toer As the world moves into the twentieth century, Minke, one of the few European-educated Javanese, optimistically starts a new life in a new town: Betawi. With his enrollment in medical school and the opportunity to meet new people, there is every reason to believe that he can leave behind the tragedies of the past. But Minke can no more escape his past than he can escape his situation as part of an oppressed people under a foreign power. As his world begins to fall apart, Minke draws a small but fervent group around him to fight back against colonial exploitation. During the struggle, Minke finds love, friendship, and betrayal—with tragic consequences. And he goes from wanting to understand his world to wanting to change it. Pramoedya's full literary genius is again evident in the remarkable characters that populate the novel—and in his depiction of a people's painful emergence from colonial domination and the shackles of tradition.

*Reading Science* 2005-07-15 J.R. Martin Reading Science looks at the distinctive language of science and technology and the role it plays in building up scientific understandings of the world. It brings together discourse analysis and critical theory for the first time in a single volume. This edited collection examines science discourse from a number of perspectives, drawing on new rhetoric, functional linguistics and critical theory. It explores this language in research and industrial contexts as well as in educational settings and in popular science writing and science fiction. The papers also include consideration of the role of images (tables and figures) in science writing and the importance of reading science discourse as multi-modal text. The internationally renowned contributors include M. A. K. Halliday, Charles Bazerman and Jay Lemke.

Gus Dur 2002 Greg Barton In October 1999, Abdurrahman Wahid, almost blind and recovering from a nearfatal stroke, was elected as Indonesia's fourth president. Referred to as 'Indonesia's surprising new president' by the Economist, the man who had commanded the highest respect of his fellow countrymen for his lifetime devotion to public service, liberal democracy and tolerant Islam, was impeached in humiliating and controversial circumstances less than two years later. Wise to some, insolent to others, Abdurrahman's mercurial style of leadership constantly confounded critics

and ultimately caused him to be widely misunderstood by both domestic and international observers. For the first time, biographer Greg Barton delves beneath the surface and gives us a unique insight into the man and his world drawn from his long relationship with Gus Dur - including being at his side during the final extraordinary months of the presidency. Those interested in the drama of modern Indonesian politics will find this book provides a fascinating and invaluable account of the enigmatic Gus Dur.

Understanding Philosophy of Science 2012-08-06 James Ladyman Few can imagine a world without telephones or televisions; many depend on computers and the Internet as part of daily life. Without scientific theory, these developments would not have been possible. In this exceptionally clear and engaging introduction to philosophy of science, James Ladyman explores the philosophical questions that arise when we reflect on the nature of the scientific method and the knowledge it produces. He discusses whether fundamental philosophical questions about knowledge and

reality might be answered by science, and considers in detail the debate between realists and antirealists about the extent of scientific knowledge. Along the way, central topics in philosophy of science, such as the demarcation of science from non-science, induction, confirmation and falsification, the relationship between theory and observation and relativism are all addressed. Important and complex current debates over underdetermination, inference to the best explanation and the implications of radical theory change are clarified and clearly explained for those new to the subject.

*Principles of Pragmatics* 2016-02-17 Geoffrey N. Leech Over the years, pragmatics - the study of the use and meaning of utterances to their situations - has become a more and more important branch of linguistics, as the inadequacies of a purely formalist, abstract approach to the study of language have become more evident. This book presents a rhetorical model of pragmatics: that is, a model which studies linguistic communication in terms of communicative goals and principles of 'good communicative behaviour'. In this respect, Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric. He does not reject the Chomskian revolution of linguistics, but rather maintains that the language system in the abstract - i.e. the 'grammar' broadly in Chomsky's sense - must be studied in relation to a fully developed theory of language use. There is therefore a division of labour between grammar and rhetoric, or (in the study of meaning) between semantics and pragmatics. The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language. In this it builds on the speech act theory of Austin and Searle, and the theory of conversational implicature of Grice, but at the same time enlarges pragmatics to include politeness, irony, phatic communion, and other social principles of linguistic behaviour.

Clinical Procedures in Veterinary Nursing 2008 Victoria Aspinall This title is directed primarily towards health care professionals outside of the

United States. The second edition of *Clinical Procedures in Veterinary Nursing* continues to provide a detailed 'skills analysis' of all the clinical procedures likely to be performed by a veterinary nurse in practice. Using its unique systematic approach, the book explains practical procedures used daily in veterinary practice, covering all aspects of a veterinary nurse's tasks, concentrating on small animal procedures. Clearly illustrated, with accompanying text provided in an accessible action-rationale format, each procedure includes an explanation of the theory behind the action, thus linking the classroom with clinical practice. With many additional and updated procedures this new edition concurs with current standards and introduces the most modern techniques to the veterinary nurse. Clear, step-by-step instructions are provided for each procedure. A reference guide to best practice for both qualified and trainee veterinary nurses, veterinary technicians, diploma students and veterinary undergraduates. Covers companion animals as well as exotic species. Fully up-dated with additional procedures throughout. Second colour increases ease of use and navigability. New chapter "Preparing for the veterinary nursing exams". New practical layout ensures concise understanding of content by giving the rationale immediately after the action. New photographs run alongside redrawn illustrations, making explanations even clearer.

Men in Groups 2017-07-12 Lionel Tiger. When *Men in Groups* was first published in 1969, the *New York Times* daily critic titled his review "The Disturbing Rediscovery of the Obvious." What was so obvious was male bonding, a phrase that entered the language. The links between males in groups Tiger describes extend through many other primate species, through our evolution as hunters/gatherers, and cross-culturally. Male bonding characterizes human groups as varied as the Vatican Council, the New York Yankees, the Elks and Masons, the secret societies of Sierra Leone and Kenya. The power of Tiger's book is its identification of the powerful links between men and the impact of females and families on essentially male groups. While the world has changed much, the argument of the book and its new introduction by the author suggest that a species-specific pattern of female bonding continues to be part of the human default system. Perhaps one day concrete evidence of its location will emerge from the startling work on the human genome, just as the elaborate and consequential sex differences to which *Men in Groups* drew such pioneering attention have already become part of the common wisdom. Meanwhile, *Men in Groups* remains a measured and responsible but intrepid inspection of a major aspect of human social organization and personal behavior. The book was controversial when it first appeared, and often foolishly and unduly scorned. But it has remained a fundamental contribution to the emerging synthesis between the social and natural sciences.

**Raumanen** 2018 Marianne Katoppo. *Raumanen*, a prize-winning novel by Marianne Katoppo, tells the story of Monang, a handsome but wayward Batak man, and Raumanen, a young Minahasa woman who, though educated and intelligent, is also a 'soft touch' when it comes to love. As is deftly revealed by the author in this novel, even in modern day Indonesia, matters of religion and ethnicity can greatly affect--for better or worse--the course of a couple's relationship.

**Understanding Media Semiotics** 2018-11-15 Marcel Danesi Media semiotics is a valuable method of focusing on the hidden meanings within media texts. This new edition brings Understanding Media Semiotics fully up to date and is written for students of the media, of linguistics and those interested in studying the ever-changing media in more detail. Offering an in-depth guide to help students investigate and understand the media using semiotic theory, this book assumes little previous knowledge of semiotics or linguistics, avoiding jargon and explaining the issues step by step. With in-depth case studies, practical accounts and directed further reading, Understanding Media Semiotics provides students with all the tools they need to understand semiotic analysis in the context of the media. Semiotic analysis is sometimes seen as complicated and difficult to understand; Marcel Danesi shows that on the contrary it can be readily understood and can greatly enrich students' understanding of media texts, from print media right through to the internet and apps.

**Anthropology and Global Counterinsurgency** 2010-04-15 John D. Kelly Global events of the early twenty-first century have placed new stress on the relationship among anthropology, governance, and war. Facing prolonged insurgency, segments of the U.S. military have taken a new interest in anthropology, prompting intense ethical and scholarly debate. Inspired by these issues, the essays in Anthropology and Global Counterinsurgency consider how anthropologists can, should, and do respond to military overtures, and they articulate anthropological perspectives on global war and power relations. This book investigates the shifting boundaries between military and civil state violence; perceptions and effects of American power around the globe; the history of counterinsurgency doctrine and practice; and debate over culture, knowledge, and conscience in counterinsurgency. These wide-ranging essays shed new light on the fraught world of Pax Americana and on the ethical and political dilemmas faced by anthropologists and military personnel alike when attempting to understand and intervene in our world.

**Understanding Reading Problems** 2012-06-04 Jean A. Gillet An audience-centered approach to public speaking Public Speaking: An Audience-Centered Approach brings theory and practice together. Its distinctive and popular approach emphasizes the importance of analyzing and considering the audience at every point in the speech making process. This model of public speaking is the foundation of the text, and it guides students through the step-by-step process of public speaking, focusing their attention on the dynamics of diverse audiences, and narrowing the gap between the classroom and the real world. MyCommunicationLab is an integral part of the Beebe/Beebe program. MyCommunicationLab is an integral part of the Beebe/Beebe program. With extensive opportunities for the application of course content, MyCommunicationLab helps students become better speakers and master key public speaking concepts.
