Changing Minds 2002 John C. O'Neal In this study of the epistemological underpinnings of cultural changes in the French enlightenment, the author shows how many of the cultural changes brought about by Eighteenth century French thinkers arose from the different forms of knowledge and experiences they pursued. The various chapters illustrate the rich interdisciplinarity of the period's thinking, which is unified by a central concern with the mind, and discuss important Enlightenment developments in aesthetics, historiography, metaphysics, anthropology, language and literature, political theory and medicine.

Strengthening Forensic Science in the United States 2009-07-29 National Research Council Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Women's Rights 2000-10-30 Lynn Walter Are women fighting over the same issues and for the same rights all around the world? What are the gains that have been made for women in different cultures over the past 200 years? Students will find answers to these and similar questions in this unique resource of fifteen case studies exploring the problems surrounding the fight for women's rights in different countries, ranging from Argentina to Zimbabwe. The history, the public perceptions, contemporary problems, the future of women's rights, and the roles of activists concerning these rights are examined. The detailed explorations provide readers with the opportunity to discover the different cultural attitudes toward women. In order to facilitate comparisons, each chapter follows a similar outcome. The countries were chosen to represent every region of the world and to provide as broad a picture as possible of the issues presented by women's struggles for equality. Each case study asks how national, cultural, class, racial, and religious differences have influenced women's rights. These different views of ways in which women have sought their rights around the world will help students to understand the fight for women's rights in a broad sense as a social issue that affects all of humanity.

Posthumanism and Phenomenology 2022-11-24 Calley A. Hornbuckle This volume investigates the intersection of phenomenology and posthumanism by rethinking the human and nonhuman specifically with regard to boredom, isolation, loneliness, and solitude. By closely examining these concepts from phenomenological, philosophical, and literary perspectives, this diverse collection of essays offers insights into the human and nonhuman in the absence of the Other and within the postapocalyptic. Topics of interest include modalities of presence and absence with regard to body, time, beast, and things; the phenomenology of corporeity; onto-poiesis and the sublime; alienation, absurdity, and phenomenology of existence; memory, posthistoricity, posthuman nihilism, and posthumanity; speculative cosmology, cosmic holism, and consciousness; ecophenomenology; and the philosophy of the aesthetic. These essays parse and probe distinct aspects of the posthuman condition and what it means to exist in a posthuman world, thereby furthering the vast, rich scope of phenomenological research and study. This text appeals to students and researchers working in these topics and fields.

Digital Copyright 2001 Jessica Litman Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written.- JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia University Litman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

Essays on the Foundations of Aristotelian Political Science 1991-01-01 Richard Bodéüs A surprising range of scholars return to the works of Aristotle as a source of fresh perspectives on their disciplines. Furthering that aim, an eclectic group of classicists and political scientists discusses the importance of Aristotle's political and ethical writings--for example, the Poetics, the Rhetoric, the Politics, and ethical and historical treatises--to contemporary approaches in political and social science. The collection examines underlying concepts such as production, race, class, and gender, as well as more traditional Aristotelian topics such as justice, monarchy and democracy, and the relationship between law and constitution. Emphasizing contemporary relevance and following Aristotle himself, this volume proceeds on the premise that the human sciences do not seek simply to increase knowledge but rather to benefit human life.
