Islam and the Moral Economy 2006-07-20 Charles Tripp How do modern Muslims adapt their traditions to engage with today's world? Charles Tripp's erudite and incisive book considers one of the most significant challenges faced by Muslims over the last sixty years: the challenge of capitalism. By reference to the works of noted Muslim scholars, the author shows how, faced by this challenge, these intellectuals devised a range of strategies which have enabled Muslims to remain true to their faith, whilst engaging effectively with a world not of their own making. The work is framed around the development of their ideas on Islamic socialism, economics and the rationale for Islamic banking. While some Muslims have resorted to confrontation or insularity to cope with the challenges of modernity, most have aspired to innovation and ingenuity in the search for compromise and interaction with global capitalism in the twenty-first century.

The Politics of the Globalization of Law 2013-05-02 Alison Brysk How does the globalization of law, the emergence of multiple and shifting venues of legal accountability, enhance or evade the fulfillment of international human rights? Alison Brysk's edited volume aims to assess the institutional and political factors that determine the influence of the globalization of law on the realization of human rights. The globalization of law has the potential to move the international human rights regime from the generation of norms to the fulfillment of rights, through direct enforcement, reshaping state policy, granting access to civil society, and global governance of transnational forces. In this volume, an international and interdisciplinary team of scholars explores the development of new norms, mechanisms, and practices of international legal accountability for human rights abuse, and tests their power in a series of "hard cases." The studies find that new norms and mechanisms have been surprisingly effective globally, in terms of treaty adherence, international courts, regime change, and even the diffusion of citizenship rights, but this effect is conditioned by regional and domestic structures of influence and access. However, law has a more mixed impact on abuses in Mexico, Israel-Palestine and India. Brysk concludes that the globalization of law is transforming sovereignty and fostering the shift from norms to fulfillment, but that peripheral states and domains often remain beyond the reach of this transformation. Theoretically framed, but comprised of empirical case material, this edited volume will be useful for both graduate students and academics in law, political science, human rights, international relations, global and international studies, and law and society.

The main theme of ICoSI 2014 "Technology and innovation challenges in natural resources and built environment management for humanity and sustainability" reflects the needs of immediate action from scientists with different fields and different geographical background to face the global issue on world's change.

Imaging in Cellular and Tissue Engineering 2013-05-16 Hanry Yu Details on specific imaging modalities for different cellular and tissue engineering applications are scattered throughout articles and chapters in the literature. Gathering this information into a single reference, *Imaging in Cellular and Tissue Engineering* presents both the fundamentals and state of the art in imaging methods, approaches, and applications in regenerative medicine. The book underscores the broadening scope of imaging applications in cellular and tissue engineering. It covers a wide range of optical and biological applications, including the repair or replacement of whole tissues (such as bone, cartilage, blood vessels, and bladder) and more novel artificially created support systems (such as artificial pancreas and bioartificial liver). Each chapter describes a

particular application, relevant optical instrumentation, physical principles governing the imaging method, and strengths and weaknesses of the technique. The book also presents current and emerging data processing procedures. As the field of tissue engineering moves from creating simpler outer body parts to more sophisticated internal organs, researchers need to evaluate and control how well the tissues are engineered and integrated into the living body. Suitable for both experts and newcomers in bioengineering and biomedical imaging, this book shows researchers how to apply imaging techniques to next-generation engineered cells and tissues. It helps them assess the suitability of specific imaging modalities for applications with various functional requirements.

Research Methods for Organizational Studies 2013-03 Donald P. Schwab This third edition of the best-selling *Research Methods for Organizational Studies* has been thoroughly revised and updated throughout to reflect the latest methodological advances in organizational research. Highly readable and filled with clear examples, this comprehensive text is designed to help graduate students in Industrial/Organizational Psychology, Human Resources Management, and Organizational Behavior conduct and evaluate research on all issues related to organizational life. This edition carries on the applied approach of its predecessors, incorporating both qualitative and quantitative methods, with new chapters on statistical modelling and reviewing research.

Managing Careers 2004 Yehuda Baruch Yehuda Baruch focuses upon career systems and the way they are managed by organizations, reflecting the diversity that exists in management studies in practice and in theory. His ideas are based upon the notion that HRM's role is to obtain and retain staff. This book focuses upon the retention role.

Achieving Environmental Excellence 1994 Stephen J. Garone

Europeanisation of Public Law 2015 Jacobine Elisabeth Brink The second edition of this textbook is a study about the relation between EU law and national public law. Familiar EU doctrines - on procedural autonomy, direct effect, consistent interpretation, ex officio application of European law, and state liability - are used as a starting point for examining the effects of these doctrines in the various Member States. Consideration is also given to important questions concerning the enforcement of EU law in the national legal order, the organization of the judiciary, and the influence of EU law on fundamental principles of (public) law, such as legal certainty, non-discrimination, and proportionality. The book is particularly designed for advanced bachelors and masters courses on the relation between national law and EU law. Because of the many examples of national case law, the book will be most welcome to any practitioner dealing with European law in a national context. [Subject: European Law, Public Law]

Built to Change 2011-02-17 Edward E. Lawler, III In this groundbreaking book, organizational effectiveness experts Edward Lawler and Christopher Worley show how organizations can be "built to change" so they can last and succeed in today's global economy. Instead of striving to create a highly reliable Swiss watch that consistently produces the same behavior, they argue organizations need to be designed in ways that stimulate and facilitate change. *Built to Change* focuses on identifying practices and designs that organizations can adopt so that they are able to change. As Lawler and Worley point out, organizations that foster continuous change are closely connected to their environments
Reward experimentation
Learn about new practices and technologies
Commit to continuously improving performance

Applications of Family and Group Theraplay 2009 Evangeline Munns This book on Theraplay is rich in content and has practical ideas guided by current research in attachment and brain research. Most chapters are illustrated with a case study including agendas from beginning, middle, and end sessions, with an extensive appendix describing each activity to help the reader translate theory into practice. Theraplay's underlying dimensions (structure, challenge, engagement, and nurture) are applied to a wide diversity of populations, cultures, and formats (family and group) geared to increasing parental attunement and caring and co-regulating the child. This book will stretch the reader's repertoire in the application of this effective, short-term, play therapy model. Book jacket.

Procurement of Works 2000 These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Making Microfinance Work 2012-01 Craig Churchill Microfinance has long been recognized as having significant potential to create jobs and reduce poverty. But to meet the twin challenges of growth and sustainability, managers of microfinance institutions (MFIs) must not only understand essential management functions: they must also be armed with innovative ideas and strategies to succeed in today's increasingly competitive environment. This book provides a valuable overview of the key management principles necessary to optimize the services of MFIs. Volume 1 examines the markets and marketing of MFIs and captures the different ways that managers can communicate the value of their products and services. It offers strategies to prevent risk from occurring and, if it does occur, explains how to rectify the situation. Practical techniques for allocating costs and determining prices are also highlighted, as well as the importance of plans, budgets and reports. Volume 2 includes chapters on various product options, including savings, insurance, leasing, money transfers, and even grants and nonfinancial services. It also explores how to combine different product menus to serve specific market segments, such as the ultra-poor, youth, women, and small and medium enterprises. It provides specific suggestions to manage diversification, including adapting the institutional culture, redistributing responsibilities, empowering staff, communicating with clients, reengineering systems, and managing change.

ASEAN Corporate Governance Scorecard 2014-06-01 Asian Development Bank Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

Smart Sustainable Cities 2020-06-26 Maysoun Ibrahim Cities often form the backbone of economic, social and cultural activities for countries around the world, with over half the world's population living in these complex urban centres. Sustainable futures for humanity will depend, to a large extent, on achieving sustainable living within these large urban centres. Cities are also very complex: They require a vast network of infrastructure, resources, services, technologies, management and planning to keep the flows of goods, people, waste and general social and economic activities going. Dr Maysoun Ibrahim analysis captures these complexities as she develops a practical road map of things that need to be in place to help a city move towards improving smartness and sustainability. The insights generated have both practical and theoretical use. As such the book provides an important contribution towards understanding and working towards a sustainable future. The books provides a base for planners, researchers, analysts and the interested observer to consider cities in a coherent and holistic model.

Support in Education 2020-11-03 Chrysta Pelissier This book aims to reflect the contours of the notion of aid as it is questioned by current scientific research. This notion appears as fuzzy in its scope of intervention, in its methods of multidisciplinary and multi-referential approaches in theoretical frameworks convened. Present in different areas that we propose to investigate in the book (training and teaching at university, inclusion in education, but also prevention, the fight against failure in orientation), the notion of help questions research in SHS and Computer Science. It comes in different formats labeled "help" but also "support", "support" or "guidance". In order to take stock of these notions and to question their differences, we convoke several authors (French and foreign) who participate by their research (-action) underlining components and environmental factors of the device that give this notion any its thickness.

Human Capital Policy 2021-02-26 David Neumark This timely book evaluates international human capital policies, offering a comparative perspective on global efforts to generate new ideas and novel ways of thinking about human capital. Examining educational reforms, quality of education and links between education and socio-economic environments, chapters contrast Western experiences and perspectives with those of industrializing economies in Asia, focusing particularly on Korea and the USA.

Improving Working as Learning 2009-05-07 Alan Felstead Interest in learning at work has captured the attention of many people around the world, often taking centre stage in policy debates about improving economic performance, prosperity and well-being. This book is about the learning that goes on in workplaces - ranging from offices, factories and shops to gyms, health centres and universities - and how it can be improved. Such learning includes everyday work activity, on-the-job instruction and off-the-job training events. Improving Working as Learning is the first book to analyze systematically learning at work in different settings by developing and applying a new analytical framework. The Working as Learning Framework connects the particularities of work tasks with the way jobs are organized and the wider pressures and constraints organizations face for survival, growth and development. The authors convincingly demonstrate that the framework offers a sophisticated understanding of how improving the work environment - both within the workplace and beyond - can enhance and sustain improvements in learning at work. Each chapter presents evidence - taken from both private and public sectors - to illustrate how the Working as Learning Framework

provides a means by which employers, researchers and policy-makers can Improve the conditions for nurturing and sustaining learning at work Build appropriate workforce development plans within given constraints Recognize that the creation and use of knowledge is widely distributed Mobilize existing workplace resources to support learning Enhance and extend our understanding of how workplace learning is shaped by relationships at, and beyond, the workplace This topical book will appeal to an international readership of undergraduate and postgraduate students, vocational teachers and trainers, human resource professionals, policy-makers, and researchers.
