Diversity in Harmony 2018-11-05 IUPsyS Highlights from one of the most successful international psychology conferences since the beginning of this century Diversity in Harmony distills the Proceedings of the 31st International Congress of Psychology into selected readings that highlight the Congress's theme. The text includes research that offers recent insights gained from multidisciplinary perspectives and methodologies. The volume also contains chapters that put psychology at the center of our understanding and ability to address the many problems facing groups and individuals in modern society. As the contributors clearly show, the social problems often require multidisciplinary approaches. With contributions from experts from around the globe, the book explores a wealth of topics that examine new synergies such as artificial empathy, prosocial primates and understanding about others' actions in chimpanzees and humans. The volume also contains readings on psychology confronting societal challenges with topics including: Culturally relevant personality assessment; Emotion-related self-regulation and Children's social, psychological and academic functioning. This vital resource: Presents readings from presentations that were highlighted at the 31st International Congress of Psychology Includes contributions from an international panel of renowned experts Offers information that compares the minds of primates and contemporary

humans, and examines human cognitive capability Contains 24 chapters that explore a wide range of topics presented at the Congress Written for professionals and students in the field, Diversity in Harmony is filled with contributions from noted experts and offers a reflection of the state of psychology in the second decade of the 21st century.

Compassion: From Neuroscience to New Horizons and Innovative, Inclusive Research Agendas 2023-11-27 Kathryn Waddington The nature and science of compassion encompasses many aspects of human behavior, social and organizational experience, with resultant debate about its definition, meaning and application. Research, theorizing and scholarship is spread across a wide range of methodological, disciplinary, historical, and cultural perspectives including psychology, sociology, psychosocial studies, organizational science, inter/national politics, and evolutionary studies. Global concerns relating to the climate crisis, COVID-19 pandemic, and mass movements of displaced people all point to an urgent need for compassion in all human interactions. New and innovative interdisciplinary approaches, agendas, and paradigms are needed to both compliment, and critique, existing understandings of the meaning and applications of compassion in all its diverse and complex forms.

The War for Kindness 2019 Jamil Zaki "A Stanford psychologist offers a bold new understanding of empathy, revealing it to be a skill, not a fixed trait, and showing, through science and stories, how we can all become more empathetic"--

Compassionate Leadership 2022-01-18 Rasmus Hougaard Leadership is hard. How can you balance compassion for your people with effectiveness in getting the job done? A global pandemic, economic volatility, natural disasters, civil and political unrest. From New York to Barcelona to Hong Kong, it can feel as if the world as we know it is coming apart. Through it all, our human spirit is being tested. Now more than ever, it's imperative for leaders to demonstrate compassion. But in hard times like these, leaders need to make hard decisions—deliver negative feedback, make difficult choices that disappoint people, and in some cases lay people off. How do you do the hard things that come with the responsibility of leadership while remaining a good human being and bringing out the best in others? Most people think we have to make a binary choice between being a good human being and being a tough, effective leader. But this is a false dichotomy. Being human and doing what needs to be done are not mutually exclusive. In truth, doing hard things and making difficult decisions is often the most compassionate thing to do. As founder and CEO of Potential Project, Rasmus Hougaard and his longtime coauthor, Jacqueline Carter, show in this powerful, practical book, you must always balance caring for your people with leadership wisdom and effectiveness. Using data from thousands of leaders, employees, and companies in nearly a hundred countries, the authors find that when leaders bring the right balance of compassion and wisdom to the job, they foster much higher levels of employee engagement, performance, loyalty, and well-being in their people. With rich examples from Netflix, IKEA, Unilever, and many other global companies, as well as practical tools and advice for leaders and managers at any level, Compassionate Leadership is your indispensable guide to doing the hard work of leadership in a human way.

Raising Happiness 2011-03-01 Christine Carter, Ph.D. What do we wish most for our children? Next to being healthy, we want them to be happy, of course! Fortunately, a wide array of scientific studies show that happiness is a learned behavior, a muscle we can help our children build and maintain. Drawing on what psychology, sociology, and neuroscience have proven about confidence, gratefulness, and optimism, and using her own chaotic and often hilarious real-world adventures as a mom to demonstrate do's and don'ts in action, Christine Carter, Ph.D, executive director of UC

Berkeley's Greater Good Science Center, boils the process down to 10 simple happiness-inducing steps. With great wit, wisdom, and compassion, Carter covers the day-to-day pressure points of parenting—how best to discipline, get kids to school and activities on time, and get dinner on the table—as well as the more elusive issues of helping children build healthy friendships and develop emotional intelligence. In these 10 key steps, she helps you interact confidently and consistently with your kids to foster the skills, habits, and mindsets that will set the stage for positive emotions now and into their adolescence and beyond. Inside you will discover • the best way avoid raising a brat—changing bad habits into good ones • tips on how to change your kids' attitude into gratitude • the trap of trying to be perfect—and how to stay clear of its pitfalls • the right way to praise kids—and why too much of the wrong kind can be just as bad as not enough • the spirit of kindness—how to raise kind, compassionate, and loving children • strategies for inspiring kids to do boring (but necessary) tasks—and become more self-motivated in the process Complete with a series of “try this” tips, secrets, and strategies, Raising Happiness is a one-of-a-kind resource that will help you instill joy in your kids—and, in the process, become more joyful yourself.

Humanity on a Tightrope 2010 Paul R. Ehrlich Focusing on what families and family values are, the authors argue how viewing the world population as one big family will lead to a more sustainable civilization.

The Compassionate Instinct: The Science of Human Goodness 2010-01-04 Dacher Keltner Leading scientists and science writers reflect on the life-changing, perspective-changing, new science of human goodness. In these pages you will hear from Steven Pinker, who asks, “Why is there peace?”; Robert Sapolsky, who examines violence among primates; Paul Ekman, who talks with the Dalai Lama about global compassion; Daniel Goleman, who proposes “constructive anger”; and many others. Led by renowned psychologist Dacher Keltner, the Greater Good Science Center, based at the University of California in Berkeley, has been at the forefront of the positive psychology movement, making discoveries about how and why people do good. Four times a year the center publishes its findings with essays on forgiveness, moral inspiration, and everyday ethics in Greater Good magazine. The best of these writings are collected here for the first time. A collection of personal stories and empirical research, *The Compassionate Instinct* will make you think not only about what it means to be happy and fulfilled but also about what it means to lead an ethical and compassionate life.

Compassion 2005-07-05 Paul Gilbert What is compassion, how does it affect the quality of our lives and how can we develop compassion for ourselves and others? Humans are capable of extreme cruelty but also considerable compassion. Often neglected in Western psychology, this book looks at how compassion may have evolved, and is linked to various capacities such as sympathy, empathy, forgiveness and warmth. Exploring the effects of early life experiences with families and peers, this book outlines how developing compassion for self and others can be key to helping people change, recover and develop ways of living that increase well-being. Focusing on the multi-dimensional nature of compassion, international contributors: explore integrative evolutionary, social constructivist, cognitive and Buddhist approaches to compassion consider how and why cruelty can flourish when our capacities for compassion are turned off, especially in particular environments focus on how therapists bring compassion into their therapeutic relationship, and examine its healing effects describe how to help patients develop inner warmth and compassion to help alleviate psychological problems. Compassion provides detailed outlines of interventions that are of particular value to psychotherapists and counsellors interested in developing compassion as a therapeutic focus in their work. It is also of value to social scientists interested in pro-social behaviour, and those seeking links between Buddhist and Western psychology.

Developing Trauma-Informed Teachers 2023-01-01 Ofelia Schepers The vision and development of this edited text are driven by a deep desire to ensure that teacher candidates are thoughtfully prepared to more fully address students' needs and create classroom environments that are safe for students and teachers. Specifically, this text will provide an understanding of how educator preparation programs are providing teacher candidates with the knowledge and skills to effectively utilize an asset-based approach to foster resiliency skills that support P-12 students who have or are experiencing trauma. This text considers how programs are developing equity-focused content, curriculum, & pedagogy to ensure teacher candidates can integrate trauma-informed practices as well as develop their own resiliency skills. This resource highlights important and relevant tools, strategies, and approaches for preparing future teachers to implement traumainformed practices within their classrooms. In recent years, much attention and resources focused on preparing teachers to more comprehensively address, acknowledge, and understand childhood trauma and the impact it has on students' lives inside and outside of the classroom. This text will be of interest to all those working in institutes of higher education, alternative licensure programs, and organizations, public schools, and districts involved with the preparation of teachers and/or professional development of in-service educators. It has the potential to serve as a catalyst for teacher preparation programs to more intentionally integrate trauma-informed practices in meaningful ways and contribute to a glaring gap within the literature focused on the systematic ways in which childhood trauma and resiliency development are being addressed in the preparation of teachers.

Against Empathy 2016-12-06 Paul Bloom New York Post Best Book of 2016 We often think of our capacity to experience the suffering of others as the ultimate source of goodness. Many of our wisest policy-makers, activists, scientists, and philosophers agree that the only problem with empathy is that we don't have enough of it. Nothing could be farther from the truth, argues Yale researcher Paul Bloom. In AGAINST EMPATHY, Bloom reveals empathy to be one of the leading motivators of inequality and immorality in society. Far from helping us to improve the lives of others, empathy is a capricious and irrational emotion that appeals to our narrow prejudices. It muddles our judgment and, ironically, often leads to cruelty. We are at our

best when we are smart enough not to rely on it, but to draw instead upon a more distanced compassion. Basing his argument on groundbreaking scientific findings, Bloom makes the case that some of the worst decisions made by individuals and nations—who to give money to, when to go to war, how to respond to climate change, and who to imprison—are too often motivated by honest, yet misplaced, emotions. With precision and wit, he demonstrates how empathy distorts our judgment in every aspect of our lives, from philanthropy and charity to the justice system; from medical care and education to parenting and marriage. Without empathy, Bloom insists, our decisions would be clearer, fairer, and—yes—ultimately more moral. Brilliantly argued, urgent and humane, AGAINST EMPATHY shows us that, when it comes to both major policy decisions and the choices we make in our everyday lives, limiting our impulse toward empathy is often the most compassionate choice we can make.

Rudolph's Pediatrics, 23rd Edition 2018-08-21 Mark W. Kline Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. The landmark pediatrics reference – completely reinvented by an all new team of editors Rudolph's Pediatrics has virtually defined the pediatric field for over a century, becoming one of the most important and well-respected pediatrics texts ever published. Renowned for its balance of clinical features and treatment of disease with underlying biological principles, this classic sourcebook has helped generations of pediatricians optimize their care of infants, children, and adolescents. The Twenty-Third Edition of Rudolph's has been completely restructured and streamlined thanks to an all new team of editors whose goal was to reinvent this classic with today's busy practitioner in mind. Presented in full color, the Twenty-Third Edition provides an up-to-date, in-depth survey of pediatric medicine unmatched by any other text. With its algorithmic approach to pediatric systems, the book facilitates the diagnosis and treatment of both common and uncommon pediatric illnesses; and it reflects new technologies and advances in molecular medicine that continue to evolve with current thinking about normal childhood development and pediatric disease processes. • New team of editors achieves consistency in both tone and depth of content • Contributions from section editors and authors from leading academic pediatrics programs give expert coverage of general pediatrics and all of the pediatric sub-specialties • Streamlined and consistent format for most chapters outlining Pathogenesis and Epidemiology, Clinical Manifestations, Diagnosis, Treatment, and Prevention • New 2-Volume presentation improves portability • Hundreds of full-color illustrations and tables • The acclaimed balance between clinical applicability and underlying biological principles offers pediatricians a depth of coverage not found anywhere else • Brand new or significantly revised chapters include: Complementary and Integrative Pediatrics, Childhood Adversity and Toxic Stress, Autism Spectrum Disorder, Pediatric Depression and Bipolar Spectrum Disorders, Extracorporeal Membrane Oxygenation (ECMO), Palliative Care for Children with Chronic Diseases, Arboviruses (with new coverage of Zika virus and chikungunya virus), Physiologic Basis of Pulmonary Function; Acute Lymphoblastic Leukemia; Neuroblastoma “You'd be hard pressed to find a resource that matches up to the comprehensive scope of Rudolph's. It's no wonder it's a staple in most offices and hospitals.” -Doody's Review Service

Forensic Accounting and Fraud Examination 2019-05-14 Mary-Jo Kranacher Forensic Accounting and Fraud Examination introduces students and professionals to the world of fraud detection and deterrence, providing a solid foundation in core concepts and methods for both public and private sector environments. Aligned with the National Institute of Justice (NIJ) model curriculum, this text provides comprehensive and up-to-date coverage of asset misappropriation, corruption, fraud, and other topics a practicing forensic accountant encounters on a daily basis. A focus on real-world practicality employs current examples and engaging case studies to reinforce comprehension, while in-depth discussions clarify technical concepts in an easily relatable style. End of chapter material and integrated IDEA and Tableau software cases introduces students to the powerful, user-friendly

tools accounting professionals use to maximize auditing and analytic capabilities, detect fraud, and comply with documentation requirements, and coverage of current methods and best practices provides immediate relevancy to real-world scenarios. Amidst increased demand for forensic accounting skills, even for entry-level accountants, this text equips students with the knowledge and skills they need to successfully engage in the field.

Psychosocial Aspects of Skin Conditions and Diseases 2023-09-25 Andrew Robert Thompson There is a growing recognition of the interplay between psychosocial factors and skin disease in relation to disease onset, flare-up, adaptation, and management. Many skin conditions are complex systemic diseases which are influenced by psychophysiological factors, and which in turn have the potential to trigger psychological distress. Further, it is well established that skin conditions ranging from acne and alopecia to psoriasis and vitiligo can be associated with considerable psychosocial burden, stigmatisation, and outright discrimination. Unfortunately, despite recent advances in medical treatments for a number of skin conditions, evidence based psychological interventions specifically targeting distress associated with skin conditions remain in short supply.

Expanding the Science of Compassion 2021-11-01 Myriam Mongrain

Compassion and the Individual 2015-01-01 His Holiness the XIVth Dalai Lama His Holiness the Dalai Lama is loved and respected world-wide as a man of peace. As spiritual leader of the Tibetan people, he has consistently advocated policies of non-violence, even in the face of great aggression - an approach that in 1989 won him the coveted Nobel Peace Prize. In lectures and tours around the world he has touched people's hearts, transcending religious, national and political barriers by the simplicity, profundity and great-heartedness of his message - that of universal responsibility and great compassion. In this small booklet he explains with utter clarity and reasoning why compassion is so inseparable from our human nature and how at any moment we can tap into and develop this birthright.

Teaching Empathy in Healthcare 2019-11-18 Adriana E. Foster Empathy is essential to effectively engaging patients as partners in care. Clinicians' empathy is increasingly understood as a professional competency, a mode and process of relating that can be learned and taught. Communication and empathy training are penetrating healthcare professions curricula as knowledge about the most effective modalities to train, maintain, and deepen empathy grows. This book draws on a wide range of contributors across many disciplines, and takes an evidence-based and longitudinal approach to clinical empathy education. It takes the reader on an engaging journey from understanding what empathy is (and how it can be measured), to approaches to empathy education informed by those understandings. It elaborates the benefits of embedding empathy training in graduate and post-graduate curricula and the importance of teaching empathy in accord with the clinician's stage of professional development. Finally, it examines systemic perspectives on empathy and empathy education in the clinical setting, addressing issues such as equity, stigma, and law. Each section is full of the latest evidence-based research, including, notably, the advances that have been made over recent decades in the neurobiology of empathy. Perspectives among the interdisciplinary chapters include: Neurobiology of empathy Measuring empathy in healthcare Teaching clinicians about affect Teaching cultural humility: Understanding the core of others by reflecting on ours Empathy and implicit bias: Can empathy training improve equity? Teaching Empathy in Healthcare: Building a New Core Competency takes an innovative and comprehensive approach towards a developed understanding of empathy in the clinical context. This evidence-based book is set to become a classic text on the topic

of empathy in healthcare settings, and will appeal to a broad readership of clinicians, educators, and researchers in clinical medicine, neuroscience, behavioral health, and the social sciences, leaders in educational and professional organizations, and anyone interested in the healthcare services they utilize.

African Industrial Design Practice 2023-09-07 Richie Moalosi The underlying principle of this book is the African philosophy of Ubuntu, which acts as a guide for developing empathic products and services. The book makes the case that empathy is the key to any successful product and service design project because it enables designers to make wise design choices that align with users' demands. Fifteen chapters provide the latest industrial design developments, techniques, and processes explicitly targeting emerging economies. At the outset, it covers the design context and the philosophy of the Ubuntu approach, which places people and communities at the centre of the development agenda. The book covers new product development, design research, design cognition, digital and traditional prototyping, bringing products to the market, establishing a company's brand name, intellectual property rights, traditional knowledge, and the business case for design in Afrika. It concludes with a discussion about the future of design and the skills aspiring designers will need. African Industrial Design Practice: Perspectives on Ubuntu Philosophy will be an essential textbook for undergraduates, postgraduates, instructors, and beginner designers in emerging economies to provide regionally contextualised design processes, illustrated examples, and outcomes.

Working With Emotional Intelligence 2011-12-07 Daniel Goleman Do you have what it takes to succeed in your career? The secret of success is not what they taught you in school. What matters most is not IQ, not a business school degree, not even technical know-how or years of expertise. The single most important factor in job performance and advancement is emotional intelligence. Emotional intelligence is actually a set of skills that anyone can acquire, and in this practical guide, Daniel Goleman identifies them, explains their importance, and shows how they can be fostered. For leaders, emotional intelligence is almost 90 percent of what sets stars apart from the mediocre. As Goleman documents, it's the essential ingredient for reaching and staying at the top in any field, even in high-tech careers. And organizations that learn to operate in emotionally intelligent ways are the companies that will remain vital and dynamic in the competitive marketplace of today—and the future.

Clinical Examination Vol 1 E-Book 2017-09-01 Nicholas J. Talley *Clinical Examination Vol 1 E-Book*

Children Philosophize Worldwide 2009 Eva Marsal Philosophizing for, with, and by children in a community of inquiry has proven to be an internationally successful learning strategy that enhances both the cognitive and emotional growth of children. Pioneering democratic programs for philosophizing with children now exist throughout the world. The work described in this book represents the latest research on theoretical concepts and applied projects within this field and brings together contributions from twenty-nine countries, representing all continents. The authors address questions on the theoretical foundation of Philosophy for Children, the application of philosophical methods, the community of inquiry, international and national didactical concepts as well as the evaluation of those concepts. A primary goal of this book is to enhance intercultural academic exchange and to encourage further research and practical work in this field.

Clinical Examination 2014 Nicholas Joseph Talley Since 1988 this textbook has provided a clear and easily grasped explanation of the origins of physical signs when examining a patient, (both historically and physiologically). Much has been rewritten to reflect new thinking and new techniques.

Empathy in Patient Care 2007-11-12 Mohammadreza Hojat Human beings, regardless of age, sex, or state of health, are designed by evolution to form meaningful interpersonal relationships through verbal and nonverbal communication. The theme that empathic human connections are

beneficial to the body and mind underlies all 12 chapters of this book, in which empathy is viewed from a multidisciplinary perspective that includes evolutionary biology; neuropsychology; clinical, social, developmental, and educational psychology; and health care delivery and education.

Becoming a Midwife 2023-02-23 Ellie Durant 'A must have for all aspiring and current student midwives and Newly Qualified Midwives.' – Carinna Griffiths, lecturer in Midwifery Written in a friendly and uplifting tone, *Becoming a Midwife* provides students and newly-qualified midwives with the tools and support they need to thrive on their course, on placement and in the early stages of their careers. The first part of the book focuses on core academic skills, including chapters on time management, writing essays and reflections, delivering presentations and preparing for exams. The book then establishes the fundamentals of clinical practice, and presents tried-and-tested strategies for developing clinical skills alongside guidance on managing workplace relationships and challenges. The final chapters help students make the transition to newly-qualified, with guidance on job applications, advocacy and career options. Acknowledging that midwifery can be a challenging and emotionally-demanding profession, this book has a strong focus on self-care and seeking support, as well as managing stress, avoiding burnout and juggling work, study and life. Chapters are enriched with insights from students and practising midwives, practical tips, worksheets to promote reflective practice and suggestions for further reading. Accompanying online resources for this title can be found at midwifediaries.com, including videos, blogs and interviews with practising midwives.

Interactions between emotions and social context - Basic, clinical and non-human evidence 2014-07-17 Maria Ruz The emotions that we feel and also those that we perceive in others are crucial to the social functioning of both humans and non-human animals. Although the role of context has been extensively studied in basic sensory processing, its relevance for social cognition and emotional processing is little understood. In recent years, several lines of research at the behavioral and neural levels have highlighted the bidirectional interactions that take place between emotions and social context. Experienced emotions, even when incidental, bias decision-making. Remarkably, even basic emotions can be strongly influenced by situational contexts. In addition, both humans and non-human animals can use emotional expressions strategically as a means of influencing and managing the behavioral response of others in relation to specific environmental situations. Moreover, social emotions (e.g., engaged in moral judgment, empathic concern and social norms) seem to be context-dependent, which also questions a purely abstract account of emotion understanding and expression, as well as other social cognition domains. The present Research Topic of *Frontiers in Human Neuroscience* highlights the need for a situated approach to emotion and social cognition. We presented theoretical and empirical work at the behavioral and neural levels that contribute to our understanding of emotion within a highly contextualized social realm, and vice-versa. Relevant contributions are presented from diverse fields, including ethology, neurology, biology, cognitive and social neuroscience, and as well as psychology and neuropsychiatry. This integrated approach that entails the interaction between emotion and social context provide important new insights into the growing field of social neuroscience.

Dangerous Love 2022-11 Jennifer Leigh Syvertsen The relationships between female sex workers and their noncommercial male partners are often assumed to be coercive and anchored in risk, dismissed as “pimp-prostitute” arrangements by researchers and the general public alike. Yet, these stereotypes unjustly erase the complexity of lives we imagine to be consumed by social suffering. *Dangerous Love* centers a framework of love to rethink sex workers’ intimate relationships as commitments to collective solidarity and survival in contexts of oppression. Combining epidemiological

research and ethnographic fieldwork in Tijuana, Mexico, Jennifer Leigh Syvertsen examines how individuals try to find love and meaning in lives marked by structural violence, social marginalization, drug addiction, and HIV/AIDS. Linking the political economy of inequalities along the border with emotional lived experience, this book explores how intimate relationships become dangerous safe havens that fundamentally shape both partners' well-being. Through these stories, we are urged to reimagine the socially transformative power of love to carve new pathways to health equity.

Exploring Urban Youth Culture Outside of the Gang Paradigm 2023-09-21 Jade Levell 'On-road' is a complex term used by young people to describe street-based subculture and a general way of being. Featuring the voices of young people, this collection explores how race, class and gender dynamics shape this aspect of youth culture. With young people on-road often becoming criminalised due to interlocking structural inequalities, this book looks beyond concerns about gangs and presents empirical research from scholars and activists who work with and study the social lives of young people. It addresses the concerns of practitioners, policy makers and scholars by analysing aspects and misinterpretations of the shifting realities of young people's urban life.

Integrative Health Promotion 2006 Susan Leddy *Integrative Health Promotion: Conceptual Bases for Nursing Practice* is a comprehensive textbook that integrates the conceptual and theoretical bases of lifestyle approaches to health promotion and holistic approaches to healing. Health belief systems, models, and theories are emphasized. Additionally, the text stimulates thought and foundations for practice through the exploration of the theoretical and evidence bases for a variety of noninvasive therapeutic interventions. *Integrative Health Promotion* discusses cultural, legal, and ethical influences on health promotion and addresses the elements of healing as a goal of nursing, as contrasted with curing. The text goes on to discuss creating a helping relationship that is characterized by presence (being rather than doing), mindfulness, respect, genuineness, active listening, empathy, and the therapeutic use of self. Promoting community health through empowerment strategies and ecocentric approaches to global health are also presented.

The Picture of Health 2011-05-10 Henri Colt Film and literature have long been mined for interesting examples and case studies in order to teach biomedical ethics to students. This volume presents a collection of about 80 very brief, accessible essays written by international experts from medicine, social sciences, and the humanities, all of whom have experience using film in their teaching of medical ethics. Each essay focuses on a single scene and the ethical issues it raises, and the volume editors have provided strict guidelines for what each essay must do, while also allowing for some creative freedom. While some of the films are obvious candidates with medical themes -- "Million Dollar Baby", "The Diving Bell and the Butterfly" -- some are novel choices, such as "Pan's Labyrinth" or "As Good as it Gets". The book will contain several general introductory chapters to major sections, and a complete filmography and cross-index at the end of the book where readers can look up individual films or ethical issues.

Friday Forward 2020-09-01 Robert Glazer FROM USA TODAY AND #1 WALL STREET JOURNAL BESTSELLING AUTHOR OF ELEVATE Wake up. Get inspired. Change the world. Repeat. Global business leader and national bestselling author, Robert Glazer, believes we all have a responsibility to each other: to give one another the inspiration and support we need to be our best. What started as a weekly note known as Friday Forward to his team of forty has turned into a global movement reaching over 200,000 leaders across sixty countries and continually forwarded to friends and

family. In FRIDAY FORWARD, Robert shares fifty-two of his favorite stories with real life examples that will motivate you to grow and push you to be your best self. At once uplifting and deeply thought-provoking, these stories will challenge you to propel yourself outside your comfort zone to unlock your innate potential. By making small, intentional changes, you have the power to create lasting impact, not only in your own life, but also to inspire those around you to do the same. Today is the perfect day to start. Glazer's collection of inspiring, thought-provoking stories gives the motivation and mentorship you need to build a more fulfilling life and career. —Daniel H. Pink, Author of When and Drive

Doing Good 2017-01-23 Thomas Nazario “When educating the minds of our youth, we must not forget to educate their hearts.” —His Holiness, the 14th Dalai Lama Are young people more interested in Snapchat than actually talking to each other? Is the local mall the first place families think of to go when they want to be happy? Too often we get caught up in acquiring more things instead of engaging in meaningful experiences with others. This can create distance between people which makes it more difficult to resolve disputes or respond compassionately when someone is in need. We can better understand what another person is thinking or feeling if we can imagine being in their shoes and experience a moment in life as they see it. It makes it easier to bully someone who is perceived to be different on the outside when, in fact, on the inside, we all basically need the same things to be happy - kindness, acceptance, purpose. Through engaging classroom activities, thoughtful homework assignments, relevant videos, and suggested projects, young people are introduced to some of our most pressing global challenges. As they work together on proposed solutions, they begin to create for themselves a meaningful life.
